

Eligible Smart Thermostats

Smart thermostats are eligible for incentives through the Standard Program, but not all smart thermostats qualify. In order to be eligible for a Standard Incentive, the thermostat must have occupancy sensing capability, or be paired with optional occupancy sensors, and operate only single-zoned systems. "Smart" or "learning" mode must also be enabled on the device to qualify.

The following thermostats are eligible for an incentive:

Alarm.com

ADC-T3000
B36-T10

Verdant

VX Smart Thermostat
ZX Smart Thermostat

Bryant

T6-WEM01-A

Honeywell

INNOCOM e7

Carrier

TP-WEM01-A

Nest

All models are eligible except for the Nest e and the Nest G4CVZ

Wisuite

WiStat-SS

Ecobee

All models qualify except for Ecobee 3 lite

The following thermostats are eligible for an incentive when paired with optional occupancy sensors:

Ecobee

Ecobee 3 Lite

Honeywell

Prestige IAQ

Additional Eligibility Requirements:

- Other thermostats may be eligible for incentives, specifications must be submitted prior to purchase to ensure eligibility.
- Smart thermostats must use true occupancy sensing and not rely on phone location or "geofencing" in order to qualify for an incentive.
- Controls for multi-zone systems may be eligible as a Custom measure.
- Thermostat measure must be controlling a system with mechanical cooling.
